Election integrity / Absentee voting

Wording a law on absentee voting reference Covid 19, certainly would be improper.

I do not see the necessity to send every person in the State an absentee ballot.

As a necessity each town should already have a list of those that are permanently disabled, for use when dispatching Police, Fire, Ambulance etc. That list should get an absentee ballot.

Those that have gone to a local doctor just prior to an election, and feel they may miss an election, should tell their doctor and the law should provide a simple method for the local doctors to file for a Ballot with the town.

I am against mass mailing of Absentee Ballots and I support in person voting with Voter ID.
